=== Sprint 3 ===

# Apr 17 Daily Scrum

Daily scrum:
Jonathan:
Did a lot of research into prisma
Blocker: Couldn't convert string to int

Same as last for everyone else

# Apr 18 Daily Scrum

Minute 0:
Zane: Tried to disable scrollbar
Plan to do today: Add weather condition
Roadblock: Scrollbar is cringe

Minute 2:
Jonathan: Tried to write an API just to realize it's redundant work
Plan to do today: Learn to use the web socket API
Roadblock: API issues

Minute 3:
Alex: Did do anything
Plan to do: Learn to use the web socket API

Sean: Did do anything
Plan to do: Learn to use the web socket API

Wu: worked on a bunch of team documents
Plan to do: Learn to use the web socket API

# Apr 22 Daily Scrum

Daily scrum:
Minute 0:
Zane: Changed theme for the menu board, added weather condition
Plan to do today: Additional touch up on the design.
Roadblock: Getting tailwind to do the correct thing.

Minute 2:
Utsawb: Rewrote the API from python to typescript. Did everything supabase would have done out of spite.
Plan to today: Talk with people to figure out menu item modifications
Roadblock: Lack of design skills

Minute 5:
Sean: Finished the cart on the side.
Plan to do today: Try to adjust for personas
Roadblock: Boredom

Minute 11:
Jonathan: Been working on the manager screen and implementing the API calls to add menu items.
Plan to do today: Keep doing that
Roadblock: Get things to run locally.

Minute 12:
Alex: Added deleting item without actually deleting from database. Update trends to only display active items.
Plan to do today: Work on the cart for the customer page.
Roadblock: Didn't write the original customer page, need to familiarize

Minute 13:

# Apr 24 Daily Scrum

Minute 0:
Zane: Added more contents to the menu board
Today: Working on test bench
Roadblock: Use effects

Minute 1:
Jonathan: Made the ingredients edit menu.
Today: WOrk on pushing updates to database
Roadblocks:

Minute 2:
Sean: Studying for other classes
Today: Studying for other classes
ROadblocks: Other classes
